Osnove mikroprocesorske elektronike

Marko Jankovec

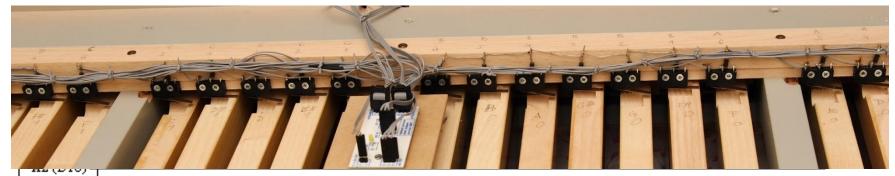

Tipke, tipkovnice in multipleksiranje

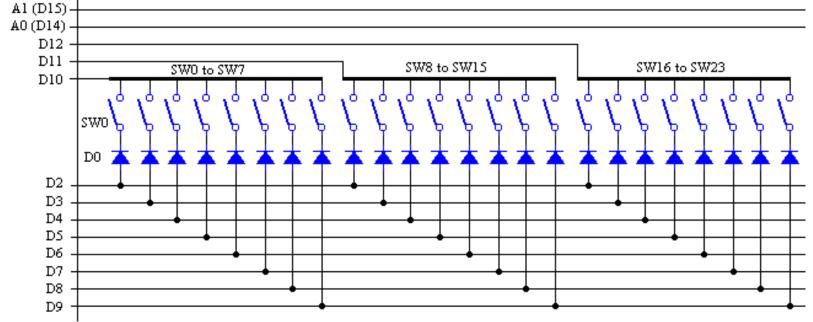

Primeri

Priklop tipk pri MiŠKu 3

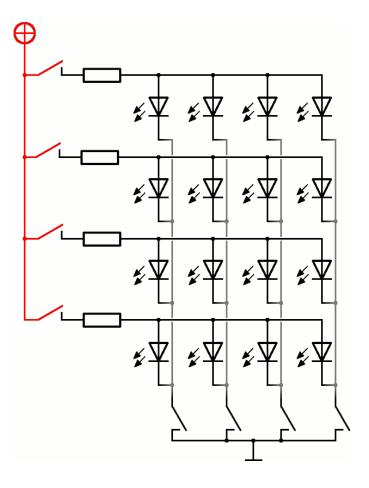

Matrika tipk glasbenega inštrumenta

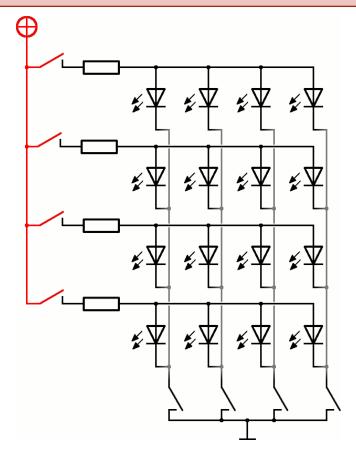

Multipleksiranje izhodov

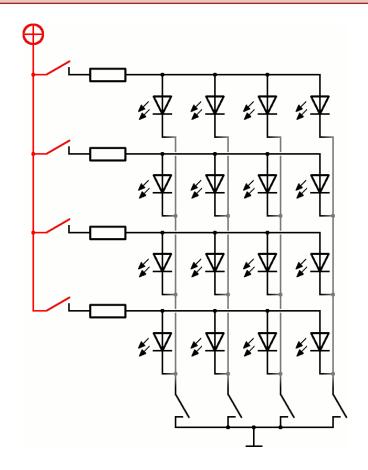

- Za $m \cdot n$ krmiljenih točk je potrebnih m + n izhodov
- Prednosti
 - Manj izhodov pri velikem številu krmilnih točk
- Slabosti
 - Signal ni konstanten utripanje
 - Kompleksnejše krmiljenje

Multipleksiranje izhodov

Po vrsticah

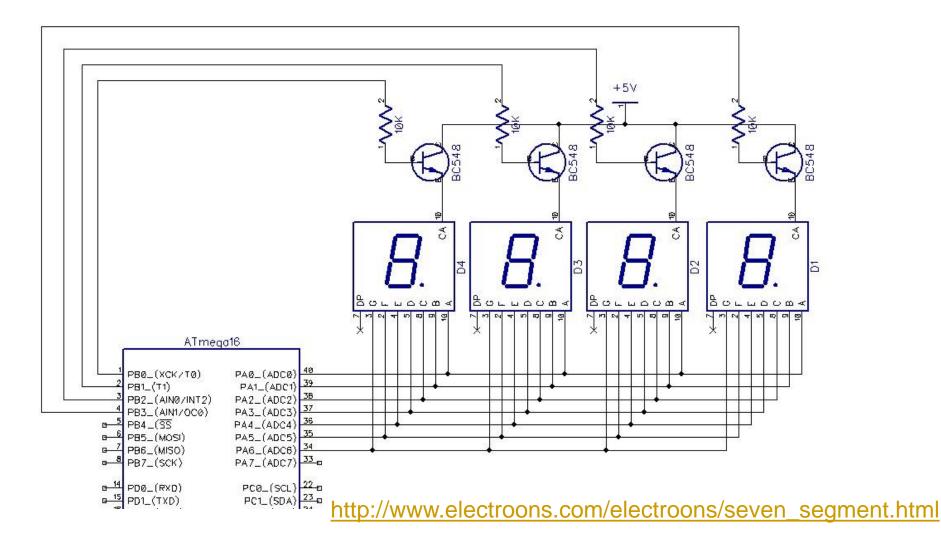

Po stolpcih
